

APPENDIX G

INTEGRATED LOGISTICS SUPPORT PLAN

1. Purpose. The Integrated Logistics Support Plan (ILSP) is the master plan for the Marine Corp's Life Cycle Logistics Support (LCLS) program. It is used to document the program, identify what ILS requirements and tasks shall be accomplished, who is responsible for their accomplishment, and how and when they will be accomplished. It contains details which form the basis for specific actions by the performing contractor and Government activities, and for developing ILS requirements to be included in contractual documents.

The ILSP documents the management approach decisions associated with logistics planning efforts. The document is also used to identify the items of equipment which are included in the Logistics Management Information System (LMIS) MCO 4400.192.

The ILSP is also used to promulgate information to field commanders on equipment scheduled for issue. It contains schedules, procedures, acceptance requirements, and information necessary to ship, process, deploy, and sustain new systems being fielded. The ILSP shall provide information in sufficient detail, accuracy, and timeliness to allow field commanders to plan for the arrival and support of the new equipment. The document shall remain in effect for the life cycle of the equipment and should be revised as necessary to update information.

2. Guidelines

A. An ILSP need not be developed for every acquisition program. The decision shall be made by the Logistics IPT representatives as to whether an ILSP shall be developed for a particular AP.

B. The Logistics IPT is responsible for overall development of the ILSP and for updating the specific areas of the plan which are pertinent to their areas of expertise. An approved ILSP becomes an agreement between the PM, the logistics IPT, and the principal activities concerned with how the logistics program will be managed. After the ILSP has been reviewed and subsequently concurred in, it will be approved and published by the Acquisition Program Manager (PM). Once the ILSP is approved for updates, the

Logistics IPT will ensure the ILSP is republished with all changes and is made available to interested organizations. If determined by the Logistic IPT, an ILSP may be written for a modification to a weapon system/equipment.

D. Milestone Application.

(1) Milestone I ILSP. By Milestone I, specific resource constraints shall be identified and documented in the body of the ILSP under each supportability element/discipline. These resource constraints are normally identified through Logistics Mananagement Information (LMI) supportability analysis. The logistics IPT should identify in the ILSP those responsible for each supportability element and related discipline, the specific activities to be accomplished during this phase, the organization (Government or contractor) that will perform each task/activity, and the schedule for task/activity completion. Requirements, tasks and milestones for future acquisition phases should also be identified. Planning data which is used by the Logistics Management Information System (LMIS) shall be included at this point as well [MCO 4400.192].

(2) Milestone II ILSP. The ILSP shall be reviewed and updated to denote completed activities and activities to be performed during the subsequent phases. By Milestone II, logistics cost drivers and targets for improvements as well as achievable supportability objectives and reliability and maintainability parameters shall be documented in the maintenance portion of the ILSP. Identification of these factors is normally accomplished through the LMI supportability analaysis. Six months prior to Milestone III plans for Post Production Support shall be developed and included as part of the ILSP. . The plan will become progressively more detailed as the program evolves.

(3)Milestone III ILSP. The ILSP shall be reviewed and updated to denote completed activities and activities to be performed during the production and fielding of the AP.

3. Staffing Procedures. The COMMARCORSYSCOM (APML) will staff the ILSP for review and input during all phases of the acquisition program to the following:

INSERT STAFFING GUIDANCE.

4. Format. ***INSERT LOGPARS FORMAT INFORMATION***
